CURRICULUM VITAE

Senior Computer Vision Engineer

Position: Senior Computer Vision Engineer | Experience years: 5 | English level: fluent

- IEEE Conference Poster in the Human-Computer Interaction field
- Attended domain-related conferences in the US, UK, Japan
- Apps in App Store and Google Play
- Master Degree in Data Science

Highly performing Research Engineer with Computer Vision/Deep Learning specialization. I'm focused on applying Computer Vision algorithms (classical and deep-learning based) for enterprise-level solutions.

Position: Lead C++ Engineer, Computer Vision
Description: Low-level Computer Vision algorithms application for manufacturing, algorithms vectorization and parallelization; Computer Vision library architecture; code review, mentoring
Technologies: C++17, OpenCV, Multithreading, TDD, CMake, Jenkins

Position: Research Engineer, HCI
Description: Various projects focused on new ways of Human-Computer Interaction: navigation in AR, touchless interfaces, combining different forms of interaction
Technologies: 3D Math, Computer Graphics, CUDA, Google Glass, ARKit/ARCore

Position: Unity Developer, Computer Vision
Description: App in App Store and Google Play: SLAM system for Augmented Reality at mobile
Technologies: Unity3D/C#, Native Mobile, OpenCV, Vuforia
Developing new algorithms/approaches in Computer Vision-related topics
